

Pro-Siler & Dohrmann Applicators

Directions: Add some water to the applicator tank, then add the required amount of inoculant and continue filling the tank.

- **One Tablespoon of inoculant is 10 grams.**
- **One entire 500 ton package mixed with 5 gallons of water will treat 500 tons.**
- See the charts below for partial mixing on Forage or Corn silage.

Pro-Siler for Forage.		0.7 gram per ton
Tons Treated	Tablespoons of Inoculant	Gallons of Water
50	3½	½
100	7	1
150	10½	1½
200	14	2
250	17½	2½
300	21	3

Pro-Siler for Corn Silage.		0.5 gram per ton
Tons Treated	Tablespoons of Inoculant	Gallons of Water
50	2½	½
100	5	1
150	7½	1½
200	10	2
250	12½	2½
300	15	3

More Info

- Diluting inoculant in a larger volume of water ensures maximum coverage.
- Do not use chlorinated water.
- Do not use hot water.
- Use any leftover mixture within 48 hours after mixing.
- Run clear water through applicator after use.
- Store package in a cool dry area.
