Forage/Haylage Mixing Chart

Directions: Add some water to the applicator tank, then add the required amount of inoculant and continue filling the tank.

- One Tablespoon of inoculant is 10 grams.
- 0.7 grams of inoculant treats 1 ton of forage or haylage.
- When in doubt, always add more inoculant. Extra coverage will not damage the crop.
- Please, see charts below for wagon size.
- These directions do not apply to Pro-Siler or Dohrmann Applicators.
 See other PDF for Pro-Siler/Dohrmann mixing.
